

Data Control Language (DCL) Commands

Q. What is Data Control Language (DCL)? Explain the concept of user privileges and demonstrate the use of GRANT and REVOKE commands.

****Definition to Remember****

****Data Control Language (DCL) is used to maintain and enforce security in a database.**

1. User Privileges and Access Control

A Privilege is a specific permission to perform an action on a database object.

| Privilege Type | Description | Examples |

| :--- | :--- | :--- |

2. GRANT Command

Gives specific privileges to a user or role.

Syntax:

sql

Examples:

sql

-- Grant all privileges to a manager role

GRANT

3. REVOKE Command

Removes previously granted privileges from a user or role.

Syntax:

sql

Examples:

sql

-- Remove all privileges from a former employee

REVOKE

****Must-Write Points (for 10 marks)****

1. DCL
