

Computer Organization vs. Architecture

Q. Define Computer Organization and Computer Architecture. Clearly distinguish between the two concepts using suitable examples.

****Definition to Remember****

****Comp**
(the "wh
architec

1. Computer Architecture (The "What")

* Deals with the attributes of a system visible to a programmer.

* Defin

2. Computer Organization (The "How")

* Deals with the operational units and their interconnections.

* Hard

3. Key Differences

| Feature | Computer Architecture | Computer Organization |

| :--- | :-

4. Real-World Example

The Intel x86 family architecture has remained largely compatible from the original 8086 up to modern processors (allowing old code to run). However, its organization (cache structures, pipelining, physical chips, clock speeds) has changed drastically over decades to improve performance.

****Must-Write Points (for 10 marks)****
