

Day 10: Advanced Data Modeling Techniques

> **Definition to Remember**

> Adv
**Inact

1. Role-Playing Dimensions & Inactive Relationships

- **Problem:** `Fact\_Sales` has both `OrderDate`, `ShipDate`, and `DeliveryDate`, all needing the `Dim\_Date` table.

- **
(dotted

2. Resolving Many-to-Many (*:*) Relationships via Bridge Tables

- Instead of using native direct Many-to-Many relationships, introduce an intermediate distinct **Bridge Table** with 1:* relationships on both sides:

3. Parent-Child Hierarchies (Organization Charts)

- Flattening manager-employee hierarchies using DAX `PATH()` and `PATHITEM()` functions.
