

Day 16: Advanced DAX Iterators (X-Functions)

> **Definition to Remember**

> **Iterators**
table, column, etc.

1. SUMX() vs SUM()

- SUM(Table[Column]) only takes a single physical column.

- SUMX(Table, ...)

2. Dynamic Ranking: RANKX()

```dax

Custom Ranking

## 3. DAX Variables: VAR ... RETURN

Variables improve performance (calculated once and cached) and enhance readability:

```dax

4. SELECTEDVALUE()

Returns the single value currently selected in a slicer, or a default fallback if multiple items are selected:

```dax
