

Day 25: Row-Level Security (Static & Dynamic RLS)

> **Definition to Remember**

> **Ro**
reps o

1. Static RLS (Hardcoded Role Rules)

- Creating fixed roles in Power BI Desktop (Modeling > Manage Roles):

```dax

// Role: EMEA\_Sales (Filter on Dim\_Geography)

Dim\_G

## 2. Dynamic RLS (User-Driven via USERPRINCIPALNAME())

- Scales to thousands of users with a single unified security role using an **User Access Mapping Table**:

...

[UserS

- **Dynamic DAX Filter on User Security Table**:

```dax

3. Testing RLS in Desktop & Service

- **Power BI Desktop:** Modeling > **View as Roles** > Enter test user email.

- **PC**

> **Must-Master Skills & Interview Points**
