

Day 28: AI & Advanced Analytics in Power BI

> **Definition to Remember**

> Power BI automates

1. Built-in Machine Learning Visuals

1. **Key Influencers Visual:**

- Use churn

2. Time-Series Forecasting & Anomaly Detection

- **Forecasting:** Adds predictive confidence bands (70%, 80%, 95% confidence intervals) to line charts based on exponential smoothing algorithms.

- **A**

3. Q&A & Copilot Integration

- **Q&A Natural Language Visual:** Allows non-technical stakeholders to type plain-English questions (e.g., "Show top 5 sales reps by profit in 2025 as a bar chart").

- **C**

> **Must-Master Skills & Interview Points**

> 1. C

> **Quick Recall**

> `Key
