and m

Union Operation ()

- **Binary operation** operates on two tables.

- **S**

2. Union Compatibility (Required Condition)

For Union (and also Intersection and Set Difference) to be valid, both relations **MUST** be Union Compatible:

| Condition | Meaning |

| :--- | :

3. Example

CRICKET_TEAM

| Student_ID | Name |

| :--- | :

FOOTBALL_TEAM

| Student_ID | Name |

| :--- | :

Query: Find all students who play Cricket OR Football or both.

CRIC

Result: Alice, Bob, Charlie, David, Eve **5 rows** (Charlie appeared in both tables but appears only once duplicate eliminated).
