

8255 Programmable Peripheral Interface (PPI) MPCA Module 4

> **Definition:** The **Intel 8255A (PPI)** is a general-purpose programmable I/O device designed to interface parallel peripheral devices (keyboards, displays, ADCs, printers) to the 8086 microprocessor.

1. Detailed Technical Explanation

1. Internal Block Diagram of 8255

The 8255 features **24** programmable I/O pins divided into three 8-bit ports:

8255 I

2. 8255 Port Selection Truth Table

| **CS** | **A₁** | **A₀** | Selected Register / Port |

3. Control Word Register (CWR) Formats

1. I/O Mode Set Control Word (**D₇ = 1**)
