

10-Mark Questions & Answers -- DBMS Module 4: Relational Database Design

Q1. Explain normalization from 1NF to BCNF in detail with a step-by-step unnormalized enterprise example.

Step 1: Unnormalized Relation (UNF)

Step 2: Convert to 1NF (Atomic Cells)

Step 3: Convert to 2NF (Remove Partial Dependencies)

Step 4: Convert to 3NF (Remove Transitive Dependencies)

Step 5: Convert to BCNF (Strict Super Key Determinants)
