

5-Mark Questions & Answers -- Data Structures Module 3: Linked Lists

Q1. Write complete C functions for Singly Linked List: Creation, Insertion, Deletion, and Traversal.

Complete working C program with struct Node and pointer manipulation functions.

Q2. Explain Queue implementation using a Singly Linked List with Front and Rear pointers in C.

* enqueue() inserts at rear->next in $O(1)$ time.

Q3. Explain Polynomial Addition using Linked Lists with an algorithm and diagram.

Traverse both polynomial lists simultaneously:
