

# Day 28: AI & Advanced Analytics in Power BI

---

> **Definition to Remember**

> Power BI automates

---

## 1. Built-in Machine Learning Visuals

1. **Key Influencers Visual**

- Use churn

## 2. Time-Series Forecasting & Anomaly Detection

- **Forecasting**: Adds predictive confidence bands (70%, 80%, 95% confidence intervals) to line charts based on exponential smoothing algorithms.

- **Anomaly**

## 3. Q&A & Copilot Integration

- **Q&A Natural Language Visual**: Allows non-technical stakeholders to type plain-English questions (e.g., "Show top 5 sales reps by profit in 2025 as a bar chart").

- **Copilot**

---

> **Must-Master Skills & Interview Points**

> 1. Core

---

> **Quick Recall**

> `Key
