

3-Mark Questions & Answers MPCA Module 6: Pentium 4 & ARM Processor

Q1. Compare 8086, 80386, Pentium 1, and Pentium 4 microprocessors.

| Feature | 8086 | 80386 | Pentium 1 | Pentium 4 |

| :--- | :

Q2. Explain ARM vs Thumb instruction states.

- **ARM State (32-bit):** Standard high-performance 32-bit instruction set with conditional execution on all instructions.

- **Thumb State (16-bit):** Compact 16-bit instruction set for low-power systems.
